

BRUSTOR B-500

OUTDOOR LIVING AWNING SYSTEM

Lean-to patio roof with sliding cover system

The B-500 Outdoor Living is a lean-to pergola with an inclined PVC roof. The roof is made of waterproof and sunshading PVC, which can be completely opened to enjoy from reduced incoming sunlight in the adjoining living room or, on the other hand, provide enough shadow when it's unfolded completely. The frontal rain gutter is responsible for the water drainage. The B-500 can be finished completely with screens, frontal and even lateral. Optional LED lighting can be integrated in the horizontal fabric profiles. The folded PVC roof is covered by protection profile, as it does with the B-300. An extra strong, white, block-out PVC fabric (850gr) exists from 3 layers and is fire resistant class M2. The bottom of the fabric is slightly textured. The roof resists wind speeds up to 60mph. The minimum roof inclination of the B-500 is 9°.

- Optional dimmable white and RGB LED strip in the frame and fabric profiles
- Optional patio heater
- Brustor colors: white textured or anthracite grey textured
- Optional 200 RAL colors
- Somfy RTS motor and transmitter included

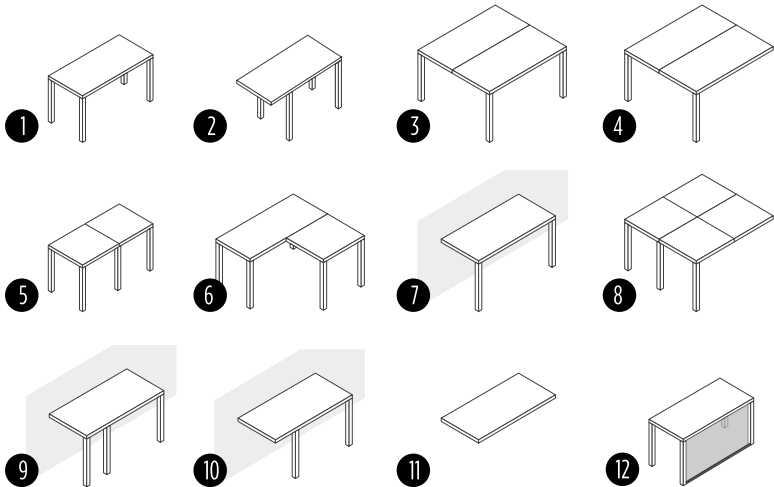

Optional:

- Integrated Zip screens
